IV

SANITARY SEWER, SOLID WASTE, DRAINAGE, POTABLE WATER
AND NATURAL GROUNDWATER AQUIFER RECHARGE ELEMENT

INTRODUCTION

The following plan element provides direction for the use, maintenance and location of general sanitary sewer, solid waste, drainage, potable water facilities and natural groundwater aquifer recharge areas in conformance with the future land use element of this Comprehensive Plan. The data collected for this plan element and analysis of this data contained in the County's Data and Analysis document, are not part of this plan element, but serve to provide a foundation and basis for the formulation of this portion of the Comprehensive Plan.

The future growth of the County depends upon the safe, adequate and economical means for the provision of public facilities and services. This portion of the Comprehensive Plan provides a goal, objectives and policies which direct the implementation and use of such public facilities in a logical and economic fashion, as well as, in a manner which is consistent with the State of Florida Comprehensive Plan, the North Central Florida Regional Strategic Policy Plan and the various elements of this Comprehensive Plan.

GOAL IV-1 - ENSURE THE PROVISION OF PUBLIC FACILITIES IN A TIMELY, ORDERLY EFFICIENT AND ECONOMICALLY FEASIBLE MANNER AT AN ACCEPTABLE LEVEL OF SERVICE FOR THE COUNTY’S POPULATION.

OBJECTIVE IV.1 The County shall continue to undertake capital improvement projects in accordance with the schedule contained in the Capital Improvements Element of this Comprehensive Plan. In general, capital improvements for public facilities to serve existing development shall be given priority over facilities to serve new development.
Policy IV.1.1 The County shall provide that within the schedule contained in the Capital Improvements Element, the capital improvement projects needed for replacement or correction of existing deficiencies be given priority over providing for future facility needs.

SANITARY SEWER FACILITY SUB ELEMENT

GOAL IV-2 - ENSURE THE PROVISION OF PUBLIC SANITARY SEWER FACILITIES IN A TIMELY, ORDERLY EFFICIENT AND ENVIRONMENTALLY SOUND MANNER AT AN ACCEPTABLE LEVEL OF SERVICE FOR THE COUNTY'S POPULATION.

OBJECTIVE IV.2 The County shall continue to coordinate the extension of, or increase in the capacity of sanitary sewer facilities by scheduling the completion of public facility improvements and requiring that they are concurrent with projected demand.

Policy IV.2.1 The County hereby establishes the following level of service standards for sanitary sewer facilities:

<table>
<thead>
<tr>
<th>FACILITY TYPE</th>
<th>LEVEL OF SERVICE STANDARD</th>
</tr>
</thead>
<tbody>
<tr>
<td>Private on-site disposal</td>
<td>Shall meet or exceed all the requirements set by Chapter 64E-6, Florida Administrative Code, in effect on January 1, 2003</td>
</tr>
<tr>
<td>New Central Facilities residential uses</td>
<td>100 gals./capita/day</td>
</tr>
</tbody>
</table>

Nonresidential uses Minimum service shall be consistent with Chapter 64E-6, Florida Administrative
Policy IV.2.2  The County shall prohibit the installation of septic tanks in locations with unsuitable soils or within wetland areas. The issuance of septic tank permits shall be a function of the Department of Health or other governmental agency having jurisdiction, subject to current regulations.

Policy IV.2.3  The County shall allow existing septic tanks and package wastewater treatment facilities to remain in service until such time as centralized sanitary sewer service is available, subject to current regulatory jurisdiction and operating standards.

Policy IV.2.4  The County shall allow the use of package wastewater facilities within Mixed Use Urban Development areas until a centralized sanitary sewer service is available, subject to current regulatory jurisdiction and operating standards.

Policy IV.2.5  The County shall limit development which proposes the construction of package wastewater treatment facilities outside the urban development areas to special use facilities, which do not promote urban sprawl. Examples: motels, parks, recreation areas, or other similar uses.

1. The County shall not issue a building permit for construction of a building or facility where sanitary sewage is proposed to be disposed using an on-site sewage disposal system in an area classified industrial on the Future Land Use Plan Map, or uses for industrial or manufacturing purposes, or its equivalent, where a centralized sanitary sewer system is available within 1/4 mile of the area used or classified industrial, or where the likelihood exists that the on-site sewage disposal system may receive toxic, hazardous or industrial waste; and

2. The County shall not issue an occupational license to the owner or tenant of a building located in an area classified industrial on the County's Future
Land Use Plan Map, or used for industrial or manufacturing purposes, or its equivalent, when such site is served by an on-site sewage disposal system without first obtaining an annual operating permit from the County Health Department; and

3. The County shall not issue a certificate or land development regulation compliance to a new owner or tenant of a building located in an area zoned industrial on the County’s Official Zoning Atlas, or used for industrial or manufacturing purposes, or its equivalent, or which operates a business which has the potential to generate toxic, hazardous or industrial wastewater, when such site is served by an on-site sewage disposal system without first obtaining an annual operating permit for an on-site sewage disposal system from the County Health Department.

Policy IV.2.6 All new development within the Urban Planning Areas of the 2035 Future Land Use Map shall be connected to central potable water and wastewater systems. Septic systems shall be prohibited. The DRI Development Order for each Urban Planning Area shall require the developer to establish a Community Development District, ("District"), or similar mechanism, pursuant to applicable provisions of Florida Law. The District shall be responsible for the design, construction, operation and maintenance of the interim water and wastewater systems within the Planning Area. As additional DRIs for each Planning Area are approved, but no later than when wastewater flows reach a level of 0.25 million gallons per day (MGD), the Taylor County Board of County Commissioners shall require the District to evaluate the feasibility of combining the interim planning area facilities into a sub-regional facility. The District evaluation shall consider the environmental and economic advantages to consolidating the interim facilities, and at its discretion, shall consolidate those interim facilities. A sub-regional facility shall be considered to serve Planning Areas 1, and 2/3; a separate sub-regional facility shall be considered to serve Planning
Areas 4/5/6, 7, and 8.

For Planning Areas in the Perry Urban Service Area, the development order for the first DRI approved for that service area shall include a condition that directs new development to be served either by the city of Perry or by a sub-regional water and wastewater system designed for the DRI. In the case that it is determined by the Taylor County Board of County Commissioners that a sub-regional plant is desired, then a condition shall be placed in the DRI requiring the establishment of a Community Development District, and the requirements shall be the same as for the Coastal District.

SOLID WASTE FACILITY SUB ELEMENT

GOAL IV.3 - ENSURE THE PROVISION OF PUBLIC SOLID WASTE FACILITIES IN A TIMELY, ORDERLY EFFICIENT AND ENVIRONMENTALLY SOUND MANNER AT AN ACCEPTABLE LEVEL OF SERVICE FOR THE COUNTY'S POPULATION.

OBJECTIVE IV.3 The County shall continue to coordinate the extension of, or increase in the capacity of solid waste facilities by scheduling the completion of public facility improvements and requiring that they are concurrent with projected demand.

Policy IV. 3.1 The County hereby establishes the following level of service standards for solid waste disposal facilities:

<table>
<thead>
<tr>
<th>FACILITY TYPE</th>
<th>LEVEL OF SERVICE STANDARD</th>
</tr>
</thead>
<tbody>
<tr>
<td>Solid Waste Landfill</td>
<td>0.78 tons per capita per year</td>
</tr>
</tbody>
</table>

Policy IV. 3.2 The County shall, singularly or in combination with other jurisdictional authorities, schedule, design, operate and maintain solid waste disposal facilities in a manner which minimizes the effects of such facilities on water and air resources and meets the permit requirements of the Department of Environmental Regulation.
DRAINAGE FACILITY SUB ELEMENT

GOAL IV-4 - ENSURE THE PROVISION OF PUBLIC DRAINAGE FACILITIES IN A TIMELY, ORDERLY EFFICIENT AND ENVIRONMENTALLY SOUND MANNER AT AN ACCEPTABLE LEVEL OF SERVICE FOR THE COUNTY’S POPULATION.

OBJECTIVE IV.4  The County shall continue to coordinate the extension of, or increase in the capacity of drainage facilities by scheduling the completion of public facility improvements and requiring that they are concurrent with projected demand.

Policy IV. 4.1

LEVEL OF SERVICE STANDARD

For all projects not exempted from Chapter 40B-4 and 62-25, Florida Administrative Code in effect on January 1, 2003 within the County, stormwater management systems must be installed such that the peak rate of post-development runoff will not exceed the peak-rate of pre-development runoff for storm events up through and including either one of the following design storms.

1. A design storm with a 10-year, 24-hour rainfall depth with Natural Resource Conservation Service Type II distribution falling on average antecedent moisture conditions for projects serving exclusively agricultural, forest, conservation, or recreational uses; or

2. A design storm with 100-year critical duration rainfall depth for projects serving any land use other than agricultural, silvicultural, conservation, or recreational issues.

3. Facilities which directly discharge into an Outstanding Florida Water shall include an additional level of treatment equal to the runoff of the first 1.5 inches of rainfall from the design storm
consistent with Chapter 62-25.025(9), Florida Administrative Code, in effect on January 1, 2003 in order to meet the receiving water quality standards of Chapter 62-302, Florida Administrative Code in effect on January 1, 2003. Stormwater discharge facilities shall be designed so as not to lower the receiving water quality below the minimum conditions necessary to assure the suitability of water for the designated use of its classification as established in Chapter 62-302, Florida Administrative Code in effect on January 1, 2003.

4. All other stormwater management projects shall be required to adhere to the standards for treatment in accordance with Chapter 40-B4, Florida Administrative Code in effect on January 1, 2003 (rules of the Suwannee River Water Management District) and the Suwannee River Water Management District Environmental Resource Permitting Applicant's Handbook, as effective on January 1, 2003. Stormwater discharge facilities shall be designed so as to not lower the receiving water quality or degrade the receiving water body below the minimum conditions necessary to maintain their classifications as established in Chapter 62-302, Florida Administrative Code in effect on January 1, 2003.

Any development exempt from Chapter 62-25 or 40B-4, Florida Administrative Code in effect on January 1, 2003, as cited above and which is adjacent to or drains into a surface water, canal, or stream, or which enters a ditch which empties into a sinkhole, shall first allow the runoff to enter a grassed swale or other conveyance designed to percolate 80 percent of the runoff from a three year, one hour design storm within 72 hours after a storm event. In addition, any development exempt from Chapter 62-25 or 40B-4, Florida Administrative Code in effect on January 1, 2003, as cited above, which is directly discharged into an Outstanding Florida Water
shall include an additional level of treatment equal to the runoff of the first 1.5 inches of rainfall from the design storm consistent with Chapter 62-25.025(9), Florida Administrative Code in effect on January 1, 2003, in order to meet the receiving water quality standards of Chapter 62-302, Florida Administrative Code in effect on January 1, 2003. Stormwater discharge facilities shall be designed so as not to lower the receiving water quality below the minimum condition necessary to assure the suitability of water for the designated use of its classification as established in Chapter 62-302, Florida Administrative Code in effect on January 1, 2003.

Policy IV. 4.2 The County shall include provisions which to control development which would significantly impact or interrupt natural drainage flows, including sheet flow and flow to isolated wetland systems, without mitigation. Normal agricultural and silvicultural activities shall be exempted from these regulations, subject to Best Management Practices 2000 as adopted by the Florida Department of Agriculture or Florida Division of Forestry, as appropriate, and also the current regulatory requirements of Chapters 373 and 403, Florida Statutes In effect on January 1, 2003.

Policy IV 4.3 The County shall require that all construction activity undertaken shall incorporate erosion and sediment controls during construction to protect the function of natural drainage features.

Policy IV 4.4 In order to maintain the water quality of the natural surface water bodies and natural floodways of rivers, streams and creeks, native vegetation within such natural surface water bodies and floodways shall be retained in a natural state. Harvesting, cutting and clearing activities, excluding silviculture activities conducted in accordance with the silviculture policy contained in the Conservation Element of this Comprehensive Plan, shall be restricted to the removal of exotic weeds. Such removal of exotic weeds shall only be conducted as part of a vegetative management program, and shall be consistent with federal, state and
water management district regulations.

Policy IV.4.5 The County shall encourage the use of stormwater and reclaimed water when available for irrigation use for new development and redevelopment.

POTABLE WATER FACILITY SUB ELEMENT

GOAL IV-5 - ENSURE THE PROVISION OF PUBLIC POTABLE WATER FACILITIES IN A TIMELY, ORDERLY EFFICIENT AND ENVIRONMENTALLY SOUND MANNER AT AN ACCEPTABLE LEVEL OF SERVICE FOR THE COUNTY’S POPULATION.

OBJECTIVE IV.5 The County shall continue to coordinate the extension of, or increase in the capacity of potable water facilities by scheduling the completion of public facility improvements and requiring that they are concurrent with projected demand.

Policy IV. 5.1 The County hereby establishes the following level of service standards for potable water.

<table>
<thead>
<tr>
<th>FACILITY TYPE</th>
<th>LEVEL OF SERVICE STANDARD</th>
</tr>
</thead>
<tbody>
<tr>
<td>Private individual water wells</td>
<td>Standards as specified in Chapter 62-22, Florida Administrative Code in effect on January 1, 2003</td>
</tr>
<tr>
<td>Keaton Beach Community Potable Water System</td>
<td>100 gallon per capita per day</td>
</tr>
<tr>
<td>Steinhatchee Community Potable Water System</td>
<td>100 gallons per capita per day</td>
</tr>
<tr>
<td>Taylor Beaches Community Potable Water System</td>
<td>100 gallons per capita per day</td>
</tr>
<tr>
<td>Other Community Potable Water Systems (Future)</td>
<td>100 gallons per capita per day</td>
</tr>
</tbody>
</table>
Policy IV. 5.2 The County shall permit residential densities in excess of 2 dwelling units per acre but less than or equal to 4 dwelling units per acre only within areas served by centralized potable water systems, and residential densities in excess of 4 dwelling units per acre only within areas served by centralized potable water and centralized sanitary sewer systems.

Policy IV.5.3 All new development within the Urban Planning Areas of the 2035 Future Land Use Map shall be connected to a central potable water facility. If potable water is not available, the establishment of a service district, construction and operation of a new facility shall be the financial responsibility of the developer and enforced through an executed development agreement, unless an existing facility is expanded.

Policy IV.5.4 The County shall encourage strategies to increase the supply of potable water, including the development of alternative potable water sources, use of reclaimed water, and increased conservation of water resources.

Policy IV.5.5 Water supply sources for the Urban Planning Areas and Rural Planning Areas of the 2035 Future Land Use Map shall be identified with an Application for Master Development Approval (AMDA).

Policy IV.5.6 Water supply providers and facilities for the Urban Planning Areas and Rural Planning Areas of the 2035 Future Land Use Map shall be identified with an Application for Incremental Development Approval (AIDA).

Policy IV.5.7 If potable water supply is not currently available to serve a proposed land use, the County shall allow development to be phased to coincide with the availability of potable water supply and facilities.

Policy IV.5.8 The County shall encourage all new development in the Urban Services Area, consistent with the Vision 2060 Plan, to provide non-potable water lines for irrigation.
NATURAL GROUNDWATER AQUIFER RECHARGE SUB ELEMENT

GOAL IV-6 - ENSURE THE PROTECTION OF SURFACE AND GROUNDWATER QUALITY AND QUANTITY BY ESTABLISHMENT OF PLANS AND PROGRAMS TO PROMOTE ORDERLY USE AND DEVELOPMENT OF LAND IN A MANNER WHICH WILL PROMOTE SUCH PROTECTION AND AVAILABILITY

OBJECTIVE IV. 6 The County shall continue to cooperate with the Water Management District for the protection of the functions of high groundwater aquifer recharge areas and natural drainage features which are consistent with current Water Management District regulations.

Policy IV. 6.1 The County shall provide for the limitation of development adjacent to natural drainage features to protect the functions of the feature by requiring a minimum of 35 foot setback from natural features and environmentally sensitive areas such as wetlands, natural water bodies and stream banks.

Policy IV. 6.2 The County shall provide for the limitation of development and associated impervious surfaces in high groundwater aquifer recharge areas designated by the Water Management District to protect the functions of the recharge area.

Policy IV. 6.3 The County shall allow the re-use of treated effluent and stormwater for irrigation, and shall encourage such re-use during the site plan review process.

Policy IV. 6.4 Stormwater management practices shall not include drainage wells and sinkholes for stormwater disposal where recharge is into potable water aquifers.

Policy IV. 6.5 The County shall provide for the limitation of development and associated impervious surfaces in high groundwater aquifer recharge areas as designated by the Water Management District and depicted in Appendix A of this Comprehensive Plan to protect the functions of the recharge area through requirement of the following:

June 2010

IV-11
1. Stormwater management practices shall not include drainage wells and sinkholes for stormwater disposal where recharge is into potable water aquifers. Where development is proposed on private property with existing private drainage wells, these wells shall be abandoned, including adequate sealing and plugging according to Chapter 62-28, Florida Administrative Code, and as administered and regulated by the Water Management District, in effect on January 1, 2003;

2. Well construction, modification or closure shall be regulated in accordance with the criteria established by the Water Management District and the Florida Department of Health;

3. Abandoned wells shall be closed in accordance with the criteria established in Chapter 62-28, Florida Administrative Code, and as administered and regulated by the Water Management District in effect on January 1, 2003;

4. No person shall discharge or cause to or permit the discharge of a regulated material as listed in Chapter 442, Florida Statutes, in effect upon adoption of this Comprehensive Plan, to the soils, groundwater, or surfacewater; and

5. No person shall tamper or bypass or cause or permit tampering with or bypassing of the containment of a regulated material storage system, except as necessary for maintenance or testing of those components.

6. The County shall require that the following impervious surface coverages (including buildings and paved areas such as driveways) be maintained within high groundwater aquifer recharge areas, as follows:

   (a) for parcels equal to or greater than 1 acre - impervious surface shall not exceed 20
percent; and

(b) for parcels less than 1 acre - impervious surface shall not exceed 40 percent.

7. The following uses shall be prohibited in high groundwater aquifer recharge areas as shown on Appendix A of this Comprehensive Plan, unless it can be demonstrated that the material in the quantity and/or solution stored or the conditions under which it is to be stored does not pose a hazard to human health and environment.

(a) Wholesale bulk fuel storage;

(b) Chemical manufacturing;

(c) Pesticide manufacturing;

(d) Battery reclamation or manufacturing;

(e) Electronics manufacturing using halogenated solvents;

(f) Hazardous waste transfer sites;

(g) Any site defined by the Resource Conservation and Recovery Act as a treatment storage or disposal facility for hazardous waste;

(h) Regional pesticide distribution site; and

(i) Underground storage tank for the storage of hazardous material except underground petroleum storage tanks.

OBJECTIVE IV. 7 The County shall continue to enforce provisions which encourage the conservation of potable water resources.

Policy IV. 7.1 The County shall continue to cooperate with the Water
Management District in the implementation of water resource conservation strategies and techniques which are adopted by the District and shall adhere to any emergency water conservation measures imposed by the Water Management District.

Policy IV. 7.2 The County shall require that all new construction and all remodeling activities utilize fixtures conforming to the following schedule of maximum water usage, consistent with the Water Conservation Act of 1982, thereby conserving potable water resources.

<table>
