

## ***SIGNAGE AND PAVEMENT MARKINGS***

1. All required pavement markings shall meet the criteria of FDOT Section 709 "Traffic Stripes and Markings-Two Reactive Components" and FDOT Section 710 "Painting Traffic Stripes".
2. All proposed roadways shall be striped based on FDOT and MUTCD passing/no-passing criteria. Edge lines and RPMs will be required on Collector and Arterial Roads and those roads that have an ADT>1,000.
3. Pavement Markings shall be as per FDOT Index 17346.
4. Retro-reflective pavement markers shall be installed as per FDOT Index 17352.
5. Sign brackets, columns, and foundations shall comply/be selected using FDOT Index 11860, 11862, and 11865, respectively.
6. Signage designated to be reused and relocated shall include furnishing new brackets, columns, and foundation.
7. Unless designated otherwise, all signs shall meet the size requirements for "Conventional Roads" per the MUTCD.
8. All intersections shall receive a minimum of a 24" stop bar, R1-1 Stop Sign, 50 feet of Centerline Striping and Street name and intersecting street name signage.
